

# Medical Air Plant

Delta P engineers and installs plants for the production of Medical Air in compliance with the main international standards (ISO and HTM) and suitable for usage in any healthcare facility world-wide.

## Control System

The microprocessor in the control panel is the heart of the system, monitoring the key parameters and managing the whole medical air plant.

## Regulation Unit

When required, special control and regulation units allow the supply of medical air into the pipe line system with different pressure values.

## Filtration Unit

The filtration unit transforms the air produced by the compressors into medical air by eliminating H<sub>2</sub>O, CO, CO<sub>2</sub> and other gases.
